

Presentation of a student project : The VEF Community Garden – AN ONLINE PRESENTATION

AUTHORS: Martin Morival, Ashkan Sandri (students at the Faculty of Veterinary Medicine, University of Zagreb, Croatia)

Collaborators: Prof. Ivana Tlak Gajger, DVM, PhD; Assoc. Prof. Denis Cvitković, DVM, PhD

DESCRIPTION

Building a garden requires quite a lot of scientific knowledge. From the soil chemistry to the benefits of insects, we will highlight the reasons behind the structural choices we had to make in this urban garden. During this presentation we will introduce the story of the VEF Community Garden, what we have done so far and what we plan to do in the future. Finally, we will outline the connections this project creates in the university as we aim to bring teachers, administration and students working together. We hope that this workshop will inspire you to take the initiative of doing the same in your university.

STRUCTURE OF THE WORKSHOP: 2 hours online presentation

DATE AND TIME: beginning of May 2023 (exact date TBA on Facebook and Twitter)

PRICE: 5€ for ISEAS members

PLATFORM: ZOOM or MS Teams (link and password will be sent to participants' email before the workshop)
